Vote Buying in Indonesia Burhanuddin Muhtadi 2019-01-01 Muhtadi's analysis of vote-buying in post-democratization Indonesia is original, profound, subtle, nuanced, and convincing as well as beautifully organized and well written. Equally important, its imaginative policy prescriptions will be widely read and cited as a significant contribution to the literature of comparative electoral politics. —William Liddle, Ohio State University, USA This book presents a pathbreaking analysis of vote-buying in Indonesia. Drawing on a stunning array of evidence, Muhtadi reveals the mechanics, patterns and effects of vote-buying with unprecedented clarity. [Title] is a must read for anyone interested in Indonesian politics or in the comparative politics of clientelism. —Edward Aspinal, Australian National University, Australia This book contains a trove of interesting research questions, a novel theoretical contribution, impressive empirical work, and a deep and nuanced understanding of the Indonesian case. —Allen Hicken, University of Michigan, USA This book is open access under a CC BY 4.0 license. This book investigates the impact of vote buying on the accountability of democratic institutions and policy representation in newly democratic countries, with a focus on Indonesia. In doing so, the book presents a wide-ranging study of the dynamics of vote buying in Indonesia's young democracy, exploring the nature, extent, determinants, targeting and effectiveness of this practice. It addresses these central issues in the context of comparative studies of vote buying, arguing that although party loyalists are disproportionately targeted in vote buying efforts, in total numbers—given the relatively small number of party loyalists in Indonesia—vote buying hits more uncommitted voters. It also demonstrates that the effectiveness of vote buying on vote choice is in the 10 percent range, which is sufficient for many candidates to secure a seat and thus explains why they still engage in vote buying despite high levels of leakage. Burhanuddin Muhtadi is a lecturer at State Islamic University, Jakarta. He is also an executive director of Indonesian Political Indicator and Director of Public Affairs at Indonesian Survey Institute (LSI). He has published his articles in numerous scholarly journals.--**Democratization in Morocco** Lise Storm 2007-10-29 This book explores the political games of the Moroccan democratization process in the period from independence in 1956 until 2006. By combining a great degree of political theory with empirical material on Morocco, it analyzes the strategies and actions of the various political actors and evaluates the level of democracy present in the country after the adoption of new constitutions in 1962, 1970, 1972, 1980, 1992 and 1996. Lise Storm demonstrates that in at least some instances, democratization has been more than simply a survival strategy - every so often, key figures within the political elite have taken the democratization process further than strictly needed for them to stay in power. In the case of Morocco, it has been the monarch who on more than one occasion has moved the country further towards the democratic ideal than he necessarily had to, and that sometimes even against the wishes of one or more of the established political parties. This book illustrates how the Moroccan political parties, like so many of their counterparts in the region, have become the main obstacle to further democratization as most of them have never honoured - or appear to have abandoned - the key function of political parties: popular representation. Democratization in Morocco will be a very valuable contribution to students and researchers interested in the dynamics behind the Moroccan democratization and the role of electoral politics in North African and Middle Eastern politics.

Reflective Democracy Robert E. Goodin 2003-02-13 Democracy used to be seen as a relatively mechanical matter of merely adding up everyone's votes in free and fair elections. That mechanistic model has many virtues, among them allowing democracy to 'track the truth', where purely factual issues are all that is at stake. Political disputes invariably mix facts with values, however, and then it is essential to listen to what people are saying rather than merely note how they are voting. The great challenge is how to implement that deliberative ideal among millions of people at once. In this strikingly original book, Goodin offers a solution: 'democratic deliberation within'. Building on models of ordinary conversational dynamics, he suggests that people simply imagine themselves in the position of various other people they have heard or read about and ask, 'What would they say about this proposal?' Informing the democratic imaginary then becomes the key to making deliberations more reflective - more empathetic, more considered, more expansive across time and distance. Oxford Political Theory presents the best new work in contemporary political theory. It is intended to be broad in scope, including original contributions to political philosophy, and also work in applied political theory. The series contains works of outstanding quality with no restriction as to approach or subject matter.

The Power of the Powerless Václav Havel 2018-09-27 Václav Havel's remarkable and rousing essay on the tyranny of apathy, with a new introduction by Timothy Snyder Cowed by life under Communist Party rule, a greengrocer hangs a placard in their shop window: Workers of the world, unite! Is it a sign of the grocer's unerring ideology? Or a symbol of the lies we perform to protect ourselves? Written in 1978, Václav Havel's meditation on political dissent - the rituals of its suppression, and the sparks that re-ignite it - would prove the guiding manifesto for uniting Solidarity movements across the Soviet Union. A portrait of activism in the face of falsehood and intimidation, *The Power of the Powerless* remains a rousing call against the allure of apathy. Learning to be Edgar Faure 1972

The Military in Burma/Myanmar David I. Steinberg 2021 The Myanmar military has dominated that complex country for most of the period since independence in 1948. The fourth coup of 1 February 2021 was the latest by the military to control those aspects of society it deemed essential to its own interests, and its perception of state interests. The military's institutional power was variously maintained by rule by decree, through political parties it founded and controlled, and through constitutional provisions it wrote that could not be amended without its approval. This fourth coup seems a product of personal demands for power between Senior General Min Aung Hlaing and Aung San Suu Kyi, and the especially humiliating defeat of the military-backed party at the hands of the National League for Democracy in the November 2020 elections. The violent and bloody suppression of widespread demonstrations continues, compromise seems unlikely, and the previous diarchic governance will not return. Myanmar's political and economic future is endangered and suppression will only result in future outbreaks of political frustration.

The Psychology of Fake News Rainer Greifeneder 2020-08-13 This volume examines the phenomenon of fake news by bringing together leading experts from different fields within psychology and related areas, and explores what has become a prominent feature of public discourse since the first Brexit referendum and the 2016 US election campaign. Dealing with misinformation is important in many areas of daily life, including politics, the marketplace, health communication, journalism, education, and science. In a general climate where facts and misinformation blur, and are intentionally blurred, this book asks what determines whether people accept and share (mis)information, and what can be done to counter misinformation? All three of these aspects need to be understood in the context of online social networks, which have fundamentally changed the way information is produced, consumed, and transmitted. The contributions within this volume summarize the most up-to-date empirical findings, theories, and applications and discuss cutting-edge ideas and future directions of interventions to counter fake news. Also providing guidance on how to handle misinformation in an age of "alternative facts", this is a fascinating and vital reading for

students and academics in psychology, communication, and political science and for professionals including policy makers and journalists.

Investing in Cultural Diversity and Intercultural Dialogue Unesco 2009 This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

Asian Economic Integration in an Era of Global Uncertainty Shiro Armstrong 2018-01-08 The Pacific Trade and Development (PAFTAD) conference series has been at the forefront of analysing challenges facing the economies of East Asia and the Pacific since its first meeting in Tokyo in January 1968. The 38th PAFTAD conference met at a key time to consider international economic integration. Earlier in the year, the people of the United Kingdom voted to leave the European Union and the United States elected Donald Trump as their next president on the back of an inward-looking 'America First' promise. Brexit and President Trump represent a growing, and worrying, trend towards protectionism in the North Atlantic countries that have led the process of globalisation since the end of the Second World War. The chapters in the volume describe the state of play in Asian economic integration but, more importantly, look forward to the region's future, and the role it might play in defending the global system that has underwritten its historic rise. Asia has the potential to stand as a bulwark against the dual threats of North Atlantic protectionism and slowing trade growth, but collective leadership will be needed regionally and difficult domestic reforms will be required in each country.

Climate Change in Asia and the Pacific Venkatachalam Anbumozhi 2012-06-13 Climate change is one of the most significant challenges to global economic development. Left unchecked, continued global warming could cause worldwide social and environmental disruption. The Asia and Pacific region is more vulnerable to climate change risks than other regions due to its dependence on the natural resources and agriculture sectors. Densely populated coastal areas, weak institutions, and the poverty of a considerable proportion of its population add to the susceptibility of this region. Adaptation—making adjustments in natural or human systems in response to actual or expected climate stimuli— becomes a key strategy for sustaining economic growth. This volume examines the framework conditions for integrating climate change adaptation measures into agriculture, water, and natural resources management activities for the Asia and Pacific region. Based on the review of country experiences, the book describes key dimensions, suggests interventions for further exploration, and serves as a basis for planning and mainstreaming climate change adaptation into sectoral planning

Process Engineering and Industrial Management Jean-Pierre Dal Pont 2013-03-04 Process Engineering, the science and art of transforming rawmaterials and energy into a vast array of commercial materials, wasconceived at the end of the 19th Century. Its history in the roleof the Process Industries has been quite honorable, and techniquesand products have contributed to improve health, welfare andquality of life. Today, industrial enterprises, which are still amajor source of wealth, have to deal with new challenges in aglobal world. They need to reconsider their strategy taking intoaccount environmental constraints, social requirements, profit,competition, and resource depletion. "Systems thinking" is a prerequisite for processdevelopment at the lab level to good project management. Newmanufacturing concepts have to be considered, taking into accountLCA, supply chain management, recycling, plant flexibility,continuous development, process intensification andinnovation. This book combines experience from academia and industry in thefield of industrialization, i.e. in all processes involved in theconversion of research into successful operations. Enterprises arefacing major challenges in a world of fierce competition andglobalization. Process engineering techniques provide ProcessIndustries with the necessary tools to cope with these issues. Governing Africa's Forests in a Globalized World Laura A. German 2009-12 Many countries around the world are engaged in decentralization processes, and most African countries face serious problems with forest governance, from benefits sharing to illegality and sustainable forest management. This book summarizes experiences to date on the extent and nature of decentralization and its outcomes, most of which suggest an underperformance of governance reforms, and explores the viability of different governance instruments in the context of weak governance and expanding commercial pressures over forests. Findings are grouped into two thematic areas: decentralization, livelihoods and sustainable forest management; and international trade, finance and forest sector governance reforms. The authors examine diverse forces shaping the forest sector, including the theory and practice of decentralization, usurpation of authority, corruption and illegality, inequitable patterns of benefits capture and expansion of international trade in timber and carbon credits, and discuss related outcomes on livelihoods, forest condition and equity. The book builds on earlier volumes exploring different dimensions of decentralization and perspectives from other world regions, and distills dimensions of forest governance that are both unique to Africa and representative of broader global patterns. Authors ground their analysis in relevant theory while attempting to distill implications of their findings for policy and practice.

Indian Politics and Society since Independence Bidyut Chakrabarty 2008-05-12 Focusing on politics and society in India, this book explores new areas enmeshed in the complex social, economic and political processes in the country. Linking the structural characteristics with the broader sociological context, the book emphasizes the strong influence of sociological issues on politics, such as social milieu shaping and the articulation of the political in day-to-day events. Political events are connected with the ever-changing

social, economic and political processes in order to provide an analytical framework to explain 'peculiarities' of Indian politics. Bidyut Chakrabarty argues that three major ideological influences of colonialism, nationalism and democracy have provided the foundational values of Indian politics. Structured thematically and chronologically, this work is a useful resource for students of political science, sociology and South Asian studies.

Poor Economics Abhijit Banerjee 2012-03-27 The winners of the Nobel Prize in Economics upend the most common assumptions about how economics works in this gripping and disruptive portrait of how poor people actually live. Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In *Poor Economics*, Abhijit V. Banerjee and Esther Duflo, two award-winning MIT professors, answer these questions based on years of field research from around the world. Called "marvelous, rewarding" by the *Wall Street Journal*, the book offers a radical rethinking of the economics of poverty and an intimate view of life on 99 cents a day. *Poor Economics* shows that creating a world without poverty begins with understanding the daily decisions facing the poor.

The Art of Peacemaking István Bibó 2015-01-01 "István Bibó (1911-1979) was a Hungarian lawyer, political thinker, prolific essayist, and minister of state for the Hungarian national government during the Hungarian Revolution of 1956. This magisterial compendium of Bibó's essays introduces English-speaking audiences to the writings of one of the foremost theorists and psychologists of twentieth-century European politics and culture. Elegantly translated by Páeter Pásztor and with a scholarly introduction by Iván Zoltán Dâenes, the essays in this volume address the causes and fallout of European political crises, postwar changes in the balance of power among countries, and nation-building processes"--

Downsizing Democracy Matthew A. Crenson 2004 In *Downsizing Democracy*, Matthew A. Crenson and Benjamin Ginsberg describe how the once powerful idea of a collective citizenry has given way to a concept of personal, autonomous democracy. Today, political change is effected through litigation, lobbying, and term limits, rather than active participation in the political process, resulting in narrow special interest groups dominating state and federal decision-making. At a time when an American's investment in the democratic process has largely been reduced to an annual contribution to a political party or organization, *Downsizing Democracy* offers a critical reassessment of American democracy.

Security and Democracy in Southern Africa Gavin Cawthra 2007 Southern Africa has embarked on one of the world's most ambitious security co-operation initiatives, seeking to roll out the principles of the United Nations at regional levels. This book examines the triangular relationship between democratization, the character of democracy and its deficits and national security practices and perceptions of eleven southern African states. Based on national studies conducted by African academics and security practitioners over three years, it includes an examination of the way security is conceived and managed, as well as a comparative analysis of regional security co-operation in the developing world. The study concludes that democratization is ambiguous and uncertain and can in some cases generate violent conflict. Building a common security regime in southern Africa will require moving beyond regime solidarity. In particular, progress will mean building multinational institutions, entrenching democratic practices, drawing on civil society and integrating the southern African project with that of the African Union. The authors conclude with a set of policy recommendations that aim to strengthen both states and civil society within the framework of an emerging common security system.

Laclau and Mouffe Anna Marie Smith 2012-10-12 Laclau and Mouffe: The Radical Democratic Imaginary is the first full-length overview of the important work of Ernesto Laclau and Chantal Mouffe. Anna Marie Smith clearly shows how Laclau and Mouffe's work has brought Gramscian, poststructuralist and psychoanalytic perspectives to revitalize traditional political theory. With clarity and insight, she shows how they have constructed a highly effective theory of identity formation and power relations that carefully draws from the criticism of political theory from postmodern anti-foundationalist political theory.

Dilemmas of Pluralist Democracy Robert A. Dahl 1983-09-10 "Continuing his career-long exploration of modern democracy, Dahl addresses a question that has long vexed students of political theory: the place of independent organizations, associations, or special interest groups within the democratic state."—The *Wilson Quarterly* "There is probably no greater expert today on the subject of democratic theory than Dahl....His proposal for an ultimate adoption here of a 'decentralized socialist economy,' a system primarily of worker ownership and control of economic production, is daring but rational, reflecting his view that economic inequality seems destined to become the major issue here it historically has been in Europe."—*Library Journal* "Dahl reaffirms his commitment to pluralist democracy while attempting to come to terms with some of its defects."—Laura Greyson, *Worldview* "Anyone who is interested in these issues and who makes the effort the book requires will come away the better for it. And more. He will receive an explanation for our current difficulties that differs considerably from the explanation for our current difficulties that differs considerably from the explanation offered by the Reagan administration, and a

prescription for the future which differs fundamentally from the nostrums emanating from the White House."—Dennis Carrigan, *The* (Louisville, Kentucky) *Courier-Journal*

Down to Earth Bruno Latour 2018-11-26 The present ecological mutation has organized the whole political landscape for the last thirty years. This could explain the deadly cocktail of exploding inequalities, massive deregulation, and conversion of the dream of globalization into a nightmare for most people. What holds these three phenomena together is the conviction, shared by some powerful people, that the ecological threat is real and that the only way for them to survive is to abandon any pretense at sharing a common future with the rest of the world. Hence their flight offshore and their massive investment in climate change denial. The Left has been slow to turn its attention to this new situation. It is still organized along an axis that goes from investment in local values to the hope of globalization and just at the time when, everywhere, people dissatisfied with the ideal of modernity are turning back to the protection of national or even ethnic borders. This is why it is urgent to shift sideways and to define politics as what leads toward the Earth and not toward the global or the national. Belonging to a territory is the phenomenon most in need of rethinking and careful redescription; learning new ways to inhabit the Earth is our biggest challenge. Bringing us down to earth is the task of politics today.

The Crisis behind the Eurocrisis Eva Nanopoulos 2019-06-30 The Crisis behind the Euro-Crisis encourages dialogue among scholars across the social sciences in an attempt to challenge the narrative that regarded the Euro-crisis as an exceptional event. It is suggested instead that the Euro-crisis, along with the subsequent crises the EU has come to face, was merely symptomatic of deeper systemic cracks. This book's aim is to uncover that hidden systemic crisis - the 'crisis behind the Euro-crisis'. Under this reading it emerges that what needs to be questioned is not only the allegedly purely economic character of the Euro-crisis, but, more fundamentally, its very classification as an 'emergency'. Instead, the Euro-crisis needs to be regarded as expressive of a chronic, dysfunctional, but 'normal' condition of the EU. By following this line of analysis, this book illuminates not only the causes of contemporary turbulences in the European project, but perhaps the 'true' nature of the EU itself.
