

Satellite Newsgathering 2nd Second Edition By Higgins Jonathan Published By Focal Press 2007

Right here, we have countless books **Satellite Newsgathering 2nd Second Edition By Higgins Jonathan Published By Focal Press 2007** and collections to check out. We additionally meet the expense of variant types and in addition to type of the books to browse. The customary book, fiction, history, novel, scientific research, as with ease as various supplementary sorts of books are readily easy to use here.

As this Satellite Newsgathering 2nd Second Edition By Higgins Jonathan Published By Focal Press 2007, it ends going on inborn one of the favored book Satellite Newsgathering 2nd Second Edition By Higgins Jonathan Published By Focal Press 2007 collections that we have. This is why you remain in the best website to see the amazing ebook to have.

Reporting War and Conflict Janet Harris 2018-10-03 Reporting War and Conflict brings together history, theory and practice to explore the issues and obstacles involved in the reporting of contemporary war and conflict. The book examines the radical changes taking place in the working practices and day-to-day routines of war journalists, arguing that managing risk has become central to modern war correspondence. How individual reporters and news organisations organise their coverage of war and conflict is increasingly shaped by a variety of personal, professional and institutional risks. The book provides an historical and theoretical context to risk culture and the work of war correspondents, paying particular attention to the changing nature of technology, organisational structures and the role of witnessing. The conflicts in Iraq, Afghanistan and Syria are examined to highlight how risk and the calculations of risk vary according to the type of conflict. The focus is on the relationship between propaganda, censorship, the sourcing of information and the challenges of reporting war in the digital world. The authors then move on to discuss the arguments around risk in relation to gender and war reporting and the coverage of death on the battlefield. Reporting War and Conflict is a guide to the contemporary changes in warfare and the media environment that have influenced war reporting. It offers students and researchers in journalism and media studies an invaluable overview of the life of a modern war correspondent.

The Media for Democracy Monitor Josef Trappel 2011-01-01

Making Media Content John A. Fortunato 2006-04-21 Making Media Content addresses the development of media content and the various factors and constituencies that influence content, such as advertisers, corporate interests, owners, and advocacy groups. It examines the strategic decision-making of mass media organizations as they determine what content they present to their audiences through broadcast, publication, or electronic access. The work focuses on the internal and external influences on media content, laying out the various processes and opening up the topic for further consideration. This book will appeal to academics in mass media, especially those studying the relationship between mass media organizations and public relations, and advertisers. Practitioners of the media, public relations, and advertising fields would be interested because there are practical applications to their industries and explanations of the communication interactions between these groups.

Proceedings of the Second International Airborne Remote Sensing Conference and Exhibition 1996

Sport, Culture & Media Rowe, David 2003-12-01 Examining the ways in which media sport has insinuated itself into contemporary everyday life, this book traces the rise of the sports media and the economic and political influences on and implications of the media sports cultural complex.

Applied Photographic Optics Sidney Ray 2002-02-20 Selected by the American Library Association's 'Choice' magazine as "best technical book", the first edition of this book soon established itself as the standard reference work on all aspects of photographic lenses and associated optical systems. This is unsurprising, as Sidney Ray provides a complete, comprehensive reference source for anyone wanting information on photographic lenses, from the student to the practitioner or specialist working with visual and digital media worldwide. This third edition has been fully revised and expanded to include the rapid progress in the last decade in optical technology and advances in relevant electronic and digital forms of imaging. Every chapter has been revised and expanded using new figures and photographs as appropriate, as well as extended bibliographies. New chapters include details of filters, measurements from images and the optical systems of digital cameras. Details of electronic

and digital imaging have been integrated throughout. More information is given on topics such as aspherics, diffractive optics, ED glasses, image stabilization, optical technology, video projection and new types of lenses. A selection of the contents includes chapters on: optical theory, aberrations, auto focus, lens testing, depth of field, development of photographic lenses, general properties of lenses, wide-angle lenses, telephoto lenses, video lenses, viewfinder systems, camera movements, projection systems and 3-D systems.

Political Communication Carsten Reinemann 2014-07-28 Against the background of an enormous expansion and diversification of both political communication itself and scientific research into its structures, processes, and effects, this volume gives an overview of some of the key theories and findings accumulated by political communication research over the last decades. In order to do so, the volume provides readers with review articles by renowned international authors on various aspects of (I) the normative, regulatory and conceptual foundations of political communication, (II) different situations of political communication (e.g., elections, referendums, social movements, media hypes, crisis and war), (III) the activities of and part played by political actors, (IV) mass media and journalism, (V) characteristics and typical features of media messages, (VI) the role played by citizens as well as (VII) various kinds of effects on citizens. Each section includes several chapters that address specific issues and research problems in the form of comprehensive overviews articles.

Insights on Reporting Sports in the Digital Age Roger Domeneghetti 2021-07-20 This first book in the Journalism Insights series examines the major practical and ethical challenges confronting contemporary sports journalists which have emerged from, or been exacerbated by, the use of digital and social media. Combining both quantitative and qualitative research and contributions from industry experts in sports reporting across Europe, America and Australia, the collection offers a valuable look at the digital sports reporting industry today. Issues discussed in the text include the ethical questions created by social media abuse received by sports journalists, the impact of social media on narratives about gender and race, and the 'silencing' of journalists over the issue of trans athletes, as well as the impact on 'traditional' aspects of sports journalism, such as the match report. The book features first-hand accounts from leading sports reporters and scholars about how these changes have affected the industry and sets out what 'best practice' looks like in this field today. This book will be a useful resource for scholars and students working in the fields of journalism, media, sports and communication, as well as for current sports journalism practitioners interested in the future of a changing industry.

Introduction to SNG and ENG Microwave Jonathan Higgins 2013-07-31 An excellent primer on the subject, this book gives beginning professionals in satellite newsgathering an introduction to the technologies and processes involved. It will also suit journalists, editors and producers needing to understand this important element of the newsgathering chain. Written for the complete beginner, the book shows how typical transmission chains work and their communication with the studio. It also offers a brief introduction to analogue and digital theory before going onto to explain Electronic Newsgathering (ENG) systems: from basic principles: transmission and reception chains, frequencies used and why, through to audio channel, subcarriers and digital modulation, as well as applications: radio cameras, window links, infra-red & laser links. A brief chapter on satellite theory gives an overview of satellite communication and orbits, basic satellite communication theory, transportables ('flyaways') and trucks, as well as analogue vs digital issues, digital compression and MPEG. Systems regulations and operations are also introduced as well as safety and logistics issues. If you're looking for a quick and easy

introduction to the subject, this book will act as an essential on the job reference guide.

Journalism Studies Andrew Calcutt 2011-01-31 Journalism Studies is a polemical textbook, aiming to rethink the field of journalism studies for the contemporary era.

Power and Public Relations Jeffrey L. Courtright 2007 The central theme of this book is that the power of public relations is both widely understood and misunderstood, and it is the latter that must be addressed. The book explores how public relations' power is obtained, used and misused in terms of both process and outcomes. The 10 case studies provide excellent examples of the breadth of perspectives and definitions of power that are available to understand power's role in public relations practice.

Journalism at risk Onur Andreotti 2015-10-01 Is journalism under threat? Censorship, political pressure, intimidation, job insecurity and attacks on the protection of journalists' sources - how can these threats be tackled? Journalism at Risk is a new book from the Council of Europe, in which ten experts from different backgrounds examine the role of journalism in democratic societies. Is journalism under threat? The image of journalists, as helmeted war correspondents protected by bullet-proof vests and armed only with cameras and microphones, springs to mind. Physical threats are only the most visible dangers, however. Journalists and journalism itself are facing other threats such as censorship, political and economic pressure, intimidation, job insecurity and attacks on the protection of journalists' sources. Social media and digital photography mean that anyone can now publish information, which is also upsetting the ethics of journalism. How can these threats be tackled? What is the role of the Council of Europe, the European Court of Human Rights and national governments in protecting journalists and freedom of expression? In this book, 10 experts from different backgrounds analyse the situation from various angles. At a time when high-quality, independent journalism is more necessary than ever - and yet when the profession is facing many different challenges - they explore the issues surrounding the role of journalism in democratic societies.

World Congress on Communication For Development 2007

"Communication for Development is a multidisciplinary area of study and work that is based on two-way models of communication, going beyond diffusion and dissemination of information. Its functions range from engaging stakeholders in problem analysis and risk assessment to supporting behavior and social change. The experiences recounted here are drawn from the various sessions of the Congress and emphasize the value of using Communication for Development to engage stakeholders in a professional and systematic manner for more effective and sustainable project design and implementation."--BOOK JACKET.

Television, Nation, and Culture in Indonesia Philip Kitley 2014-07-31 The culture of television in Indonesia began with its establishment in 1962 as a public broadcasting service. From that time, through the deregulation of television broadcasting in 1990 and the establishment of commercial channels, television can be understood, Philip Kitley argues, as a part of the New Order's national culture project, designed to legitimate an idealized Indonesian national cultural identity. But Professor Kitley suggests that it also has become a site for the contestation of elements of the New Order's cultural policies. Based on his studies, he further speculates on the increasingly significant role that television is destined to play as a site of cultural and political struggle.

Book Review Index 2001 Cumulation Dana Ferguson 2001-09

The Handbook of Mass Media Ethics Lee Wilkins 2008-09-17 This Handbook encapsulates the intellectual history of mass media ethics over the past twenty-five years. Chapters serve as a summary of existing research and thinking in the field, as well as setting agenda items for future research. Key features include: up-to-date and comprehensive coverage of media ethics, one of the hottest topics in the media community 'one-stop shopping' for historical and current research in media ethics experienced, top-tier editors, advisory board, and contributors. It will be an essential reference on media ethics theory and research for scholars, graduate students, and researchers in media, mass communication, and journalism.

The CNN Effect Piers Robinson 2005-07-08 The CNN Effect examines the relationship between the state and its media, and considers the role played by the news reporting in a series of 'humanitarian' interventions in Iraq, Somalia, Bosnia, Kosovo and Rwanda. Piers Robinson challenges traditional views of media subservience and argues that sympathetic news coverage at key moments in foreign crises can influence the response of Western governments.

Broadcasting & Cable 2004

McQuail's Mass Communication Theory Denis McQuail 2005-04-30

The Fifth Edition of this bestselling textbook provides a comprehensive, non-technical introduction to the range of approaches to understanding mass communication. Fully revised, and with new student-friendly features, McQuail's Mass Communication Theory offers an integrated treatment of the major components of mass communication - the sender, the message, and the audience; considers all the diverse forms of mass communication in contemporary societies - television, radio, newspapers, film, music, the Internet and other forms of new media; and demonstrates how theories of mass communication relate to the broader understanding of society and culture.

Digital Investigative Journalism Oliver Hahn 2018-12-28 In the post-digital era, investigative journalism around the world faces a revolutionary shift in the way information is gathered and interpreted. Reporters in the field are confronted with data sources, new logics of information dissemination, and a flood of disinformation. Investigative journalists are working with programmers, designers and scientists to develop innovative tools and hands-on approaches that assist them in disclosing the misuse of power and uncovering injustice. This volume provides an overview of the most sophisticated techniques of digital investigative journalism: data and computational journalism, which investigates stories hidden in numbers; immersive journalism, which digs into virtual reality; drone journalism, which conquers hitherto inaccessible territories; visual and interactive journalism, which reforms storytelling with images and audience perspectives; and digital forensics and visual analytics, which help to authenticate digital content and identify sources in order to detect manipulation. All these techniques are discussed against the backdrop of international political scenarios and globally networked societies. This edited volume, written by renowned international media practitioners and scholars, is full of illuminating insights into digital investigative journalism and addresses professional journalists, journalism researchers and students.

A Future for Public Service Television Des Freedman 2018-05-04 A guide to the nature, purpose, and place of public service television within a multi-platform, multichannel ecology. Television is on the verge of both decline and rebirth. Vast technological change has brought about financial uncertainty as well as new creative possibilities for producers, distributors, and viewers. This volume from Goldsmiths Press examines not only the unexpected resilience of TV as cultural pastime and aesthetic practice but also the prospects for public service television in a digital, multichannel ecology. The proliferation of platforms from Amazon and Netflix to YouTube and the vlogosphere means intense competition for audiences traditionally dominated by legacy broadcasters. Public service broadcasters—whether the BBC, the German ARD, or the Canadian Broadcasting Corporation—are particularly vulnerable to this volatility. Born in the more stable political and cultural conditions of the twentieth century, they face a range of pressures on their revenue, their remits, and indeed their very futures. This book reflects on the issues raised in Lord Putnam's 2016 Public Service TV Inquiry Report, with contributions from leading broadcasters, academics, and regulators. With resonance for students, professionals, and consumers with a stake in British media, it serves both as historical record and as a look at the future of television in an on-demand age. Contributors include Tess Alps, Patrick Barwise, James Bennett, Georgie Born, Natasha Cox, Gunn Enli, Des Freedman, Vana Goblot, David Hendy, Jennifer Holt, Amanda D. Lotz, Sarita Malik, Matthew Powers, Lord Putnam, Trine Syvertsen, Jon Thoday, Mark Thompson

The War Correspondent Greg McLaughlin 2016-02-20 The War Correspondent looks at the role of the war reporter today: the attractions and the risks of the job; the challenge of objectivity and impartiality in the war zone; the danger that journalistic independence is being compromised by military control, censorship and public relations; as well as the commercial and technological pressures of an intensely concentrated, competitive news media environment. This new edition substantially updates the original, ending with an extended section on the return of history and ideology to the reporting of international conflict. It examines the 'war on terror' framework that dominated the first decade of the 21st century and, as Russia imposes itself once again on the international stage, asks if it might well give way to a new, Cold War framework. If so, what will that mean for the new generation of war correspondents, attuned not to history or ideology but to the politics of the next conflict? The book features interviews with prominent war and foreign correspondents such as John Pilger, Robert Fisk, Mary Dejevsky and Alex Thomson.

Satellite Newsgathering Jonathan Higgins 2000 Praise for the first edition: "It is a wonderful source of information and has the merit of going

straight to the subject, being technically precise although very easy to understand. There are numerous pictures, photographs, diagrams, which make the reading a real pleasure." --European Broadcasting Union Technical Review "The complexity of a satellite newsgathering system could be a four-month long college course with a high tuition rate and an enrolment number so large you have to watch your professor on a TV screen. Jonathan Higgins might have saved the independent learner a few attendance point deductions by fitting it into one book." --Satellite Broadband magazine An ideal introduction for anyone working, or interested, in satellite newsgathering (SNG). This book is an important and valuable work that is extremely easy to read, comprehensive in its treatment, and detailed where necessary. SNG used to be an immensely complex and expensive affair where broadcasting organizations were at the mercy of an expert who sat in a lonely corner, until needed. Things have changed--everyone in a global news organization needs to know about it now. This is not only because of the high costs of mistakes, but because now even non-technical journalists on the ground have to operate their own equipment. Learn the skills, basics of the equipment, cutting edge technology and critical safety issues of satellite newsgathering. * An informative guide for engineers and technicians, as well as journalists and editorial management working, or interested, in satellite newsgathering * Practical and theoretical insights into the technology and its application provide a complete overview * Discover how to overcome problems when operating SNG systems worldwide

The Hundred-Year Marathon Michael Pillsbury 2015-02-03 One of the U.S. government's leading China experts reveals the hidden strategy fueling that country's rise - and how Americans have been seduced into helping China overtake us as the world's leading superpower. For more than forty years, the United States has played an indispensable role helping the Chinese government build a booming economy, develop its scientific and military capabilities, and take its place on the world stage, in the belief that China's rise will bring us cooperation, diplomacy, and free trade. But what if the "China Dream" is to replace us, just as America replaced the British Empire, without firing a shot? Based on interviews with Chinese defectors and newly declassified, previously undisclosed national security documents, *The Hundred-Year Marathon* reveals China's secret strategy to supplant the United States as the world's dominant power, and to do so by 2049, the one-hundredth anniversary of the founding of the People's Republic. Michael Pillsbury, a fluent Mandarin speaker who has served in senior national security positions in the U.S. government since the days of Richard Nixon and Henry Kissinger, draws on his decades of contact with the "hawks" in China's military and intelligence agencies and translates their documents, speeches, and books to show how the teachings of traditional Chinese statecraft underpin their actions. He offers an inside look at how the Chinese really view America and its leaders - as barbarians who will be the architects of their own demise. Pillsbury also explains how the U.S. government has helped - sometimes unwittingly and sometimes deliberately - to make this "China Dream" come true, and he calls for the United States to implement a new, more competitive strategy toward China as it really is, and not as we might wish it to be. *The Hundred-Year Marathon* is a wake-up call as we face the greatest national security challenge of the twenty-first century.

What is Digital Journalism Studies? Steen Steensen 2020-07-21 What is Digital Journalism Studies? delves into the technologies, platforms, and audience relations that constitute digital journalism studies' central objects of study, outlining its principal theories, the research methods being developed, its normative underpinnings, and possible futures for the academic field. The book argues that digital journalism studies is much more than the study of journalism produced, distributed, and consumed with the aid of digital technologies. Rather, the scholarly field of digital journalism studies is built on questions that disrupt much of what previously was taken for granted concerning media, journalism, and public spheres, asking questions like: What is a news organisation? To what degree has news become separated from journalism? What roles do platform companies and emerging technologies play in the production, distribution, and consumption of news and journalism? The book reviews the research into these questions and argues that digital journalism studies constitutes a cross-disciplinary field that does not focus on journalism solely from the traditions of journalism studies, but is open to research from and conversations with related fields. This is a timely overview of an increasingly prominent field of media studies that will be of particular interest to academics, researchers, and students of journalism and communication.

International Broadcasting Convention Institution of Electrical Engineers 1996

We Are Bellingcat Eliot Higgins 2021-02-04 THE SUNDAY TIMES BESTSELLER 'John le Carré demystified the intelligence services; Higgins has demystified intelligence gathering itself' Financial Times 'Uplifting . . . Riveting . . . What will fire people through these pages, gripped, is the focused, and extraordinary investigations that Bellingcat runs . . . Each runs as if the concluding chapter of a Holmesian whodunit' Telegraph 'We Are Bellingcat is Higgins's gripping account of how he reinvented reporting for the internet age . . . A manifesto for optimism in a dark age' Luke Harding, Observer How did a collective of self-taught internet sleuths end up solving some of the biggest crimes of our time? Bellingcat, the home-grown investigative unit, is redefining the way we think about news, politics and the digital future. Here, their founder - a high-school dropout on a kitchen laptop - tells the story of how they created a whole new category of information-gathering, galvanising citizen journalists across the globe to expose war crimes and pick apart disinformation, using just their computers. From the downing of Malaysia Flight 17 over the Ukraine to the sourcing of weapons in the Syrian Civil War and the identification of the Salisbury poisoners, *We Are Bellingcat* digs deep into some of Bellingcat's most successful investigations. It explores the most cutting-edge tools for analysing data, from virtual-reality software that can build photorealistic 3D models of a crime scene, to apps that can identify exactly what time of day a photograph was taken. In our age of uncertain truths, Bellingcat is what the world needs right now - an intelligence agency by the people, for the people.

English as a Global Language David Crystal 2012-03-29 David Crystal's classic *English as a Global Language* considers the history, present status and future of the English language, focusing on its role as the leading international language. English has been deemed the most 'successful' language ever, with 1500 million speakers internationally, presenting a difficult task to those who wish to investigate it in its entirety. However, Crystal explores the subject in a measured but engaging way, always backing up observations with facts and figures. Written in a detailed and fascinating manner, this is a book written by an expert both for specialists in the subject and for general readers interested in the English language. *Understanding GPS* Elliott D. Kaplan 2006 Appendix B: Stability Measures for Frequency Sources 665 Appendix C: Free-Space Propagation Loss 669; About the Authors 675; Index 683; Mobile Communications Library.

Broadcast News Producing Brad Schultz 2005 Brad Schultz follows the process of news production from the creation of story ideas to presentation on air, in television, radio & on the Internet. He also discusses issues facing producers, such as newsroom leadership, resource management & newsroom relationships.

Crisis Management in the Food and Drinks Industry: A Practical Approach Colin Doeg 2005-07-29 Few titles could be timelier than the second edition of *Crisis Management in the Food and Drinks Industry - A Practical Approach*. The world is worrying about a human pandemic arising from the avian flu epidemic that is spreading from the Far East, the implications of which could be as great for the food industry as were the outbreaks of foot and mouth disease and BSE. This practical and greatly expanded edition by media and public relations veteran Colin Doeg focuses on the communications aspects of dealing with a crisis. It is global in its coverage of the subject, reviewing practices and requirements in countries ranging from the USA and the UK to Australia and New Zealand. Doeg offers advice ranging from preparing for the unthinkable to the dramatic expansion of the Internet, avoiding being caught off-guard by a situation, the ramifications of product tampering and managing an actual crisis. Advice is also offered on dealing with extremist organizations and terrorist threats as well as bioterrorism - "a clear and present danger" - and a number of problems facing the food industry, including the practice of selling meat unfit for human consumption and the threat posed by the increasing toxicity of fish due to the rising pollution of the world's oceans. In a special late chapter - written only three months before publication - the author looks ahead to events which he believes will shape the world of crisis management in the future, including the empowering influence of the Internet during the 2004 Asian Tsunami, the discovery of the illegal dye Sudan 1 (Red) in millions of food products and the fears of a pandemic arising from the spreading outbreak of avian flu. Examples of typical documents like a crisis plan for a business, a crisis checklist, a press release announcing a product recall, an announcement to employees and a checklist for anyone dealing with a threatening phone call are provided. Also included is a list of sources of information and assistance in the event of a product crisis. *Crisis Management in the Food and Drinks Industry* is the only title dealing specifically with this crucial subject in relation to the food industry. As such, it is relevant not only to those in the food industry, but also to marketing and senior management

in general in the fields of agriculture, public health and law enforcement. *The New Communications Technologies* Michael M. Mirabito 2004 As new communications applications are developed and brought to market, it is vital for communications professionals to keep abreast of these issues. Since the technologies and applications also affect our daily lives, it is important to understand how they will shape the country and, by extension, the world at large. International censorship, the impact of the Internet and wireless tools, and the legislation following the World Trade Center bombing all fall into this category. *The New Communications Technologies, Fifth Edition*, provides vital information on the new and emerging technologies that will shape the way communicators do business. The book explores the new communications technologies and covers topics ranging from multimedia and production to satellites to digital communication. Just as important, the book examines the social, economic, and political impact brought about by the adoption of such technologies and applications; this fallout includes privacy concerns, First Amendment issues, and the implications raised by biometric systems. * Expanded coverage of emerging technologies, and legal issues * Completely reorganized to enhance the information flow from topic to topic * The authors' Instructor's Manual is available from the Publisher *Foreign Correspondence* John Maxwell Hamilton 2013-09-13 Despite the importance of foreign news, its history, transformation and indeed its future have not been much studied. The scholarly community often calls attention to journalism's shortcomings covering the world, yet the topic has not been systematically examined across countries or over time. The need to redress this neglect and the desire to assess the impact of new media technologies on the future of journalism - including foreign correspondence - provide the motivation for this stimulating, exciting and thought-provoking book. While the old economic models supporting news have crumbled in the wake of new media technologies, these changes have the potential to bring new and improved ways to inform people of foreign news. In an increasingly globalized era, journalism is being transformed by the effortlessly quick sharing of information across national boundaries. As such, we need to reconsider foreign correspondence and explore where such reporting is headed. This book discusses the current state and future prospects for foreign correspondence across the full range of media platforms, and assesses developments in the reporting of overseas news for audiences, governments and foreign policy in both contemporary and historical settings around the globe. As Emmy Award and Pulitzer Prize-winning correspondent Serge Schmemmann reminds us in this book, "quality journalism and unbiased reporting are as valid and necessary today as they ever were [...] one of the primary tasks of journalists and scholars as they follow the changes taking place must be to ensure that the 'new international information order' now imposed by the Internet remains true to the ideals and traditions that define our journalism." This book was originally published as a special issue of *Journalism Studies*.

Journalism and Truth in an Age of Social Media James E. Katz 2019-08-06 Truth qualities of journalism are under intense scrutiny in today's world. Journalistic scandals have eroded public confidence in mainstream media while pioneering news media compete to satisfy the public's appetite for news. Still worse is the specter of "fake news" that looms over media and political systems that underpin everything from social stability to global governance. This volume aims to illuminate the contentious media landscape to help journalism students, scholars, and professionals understand contemporary conditions and arm them to deal with a spectrum of new developments ranging from technology and politics to best practices. Fake news is among the greatest of these concerns, and can encompass everything from sarcastic or ironic humor to bot-generated, made-up stories. It can also include the pernicious transmission of selected, biased facts, the use of incomplete or misleadingly selective framing of stories, and photographs that editorially convey certain characteristics. This edited volume contextualizes the current "fake news problem." Yet it also offers a larger perspective on what seems to be uniquely modern, computer-driven problems. We must remember that we have lived with the problem of people having to identify, characterize, and communicate the truth about the world around them for millennia. Rather than identify a single culprit for disseminating

misinformation, this volume examines how news is perceived and identified, how news is presented to the public, and how the public responds to news. It considers social media's effect on the craft of journalism, as well as the growing role of algorithms, big data, and automatic content-production regimes. As an edited collection, this volume gathers leading scholars in the fields of journalism and communication studies, philosophy, and the social sciences to address critical questions of how we should understand journalism's changing landscape as it relates to fundamental questions about the role of truth and information in society.

The British National Bibliography Arthur James Wells 2007

The Global Investigative Journalism Casebook Mark Hunter 2012

Women and Journalism Deborah Chambers 2004-06-01 *Women and Journalism* offers a rich and comprehensive analysis of the roles, status and experiences of women journalists in the United States and Britain. Drawing on a variety of sources and dealing with a host of women journalists ranging from nineteenth century pioneers to Martha Gellhorn, Kate Adie and Veronica Guerin, the authors investigate the challenges women have faced in their struggle to establish reputations as professionals. This book provides an account of the gendered structuring of journalism in print, radio and television and speculates about women's still-emerging role in online journalism. Their accomplishments as war correspondents are tracked to the present, including a study of the role they played post-September 11th.

Journalism, fake news & disinformation Ireton, Cheryl 2018-09-17

Satellite Newsgathering Jonathan Higgins 2012-08-06 Praise for the first edition: "It is a wonderful source of information and has the merit of going straight to the subject, being technically precise although very easy to understand. There are numerous pictures, photographs, diagrams, which make the reading a real pleasure." --European Broadcasting Union Technical Review "The complexity of a satellite newsgathering system could be a four-month long college course with a high tuition rate and an enrolment number so large you have to watch your professor on a TV screen. Jonathan Higgins might have saved the independent learner a few attendance point deductions by fitting it into one book." --Satellite Broadband magazine An ideal introduction for anyone working, or interested, in satellite newsgathering (SNG). The new edition of this popular book builds upon the success of the first--an important and valuable work that is extremely easy to read, comprehensive in its treatment, and detailed where necessary. SNG used to be an immensely complex and expensive affair where broadcasting organizations were at the mercy of an expert who sat in a lonely corner, until needed. Things have changed--everyone in a global news organization needs to know about it now. This is not only because of the high costs of mistakes, but because now even non-technical journalists on the ground have to operate their own equipment. Learn the skills, basics of equipment, cutting edge technology and critical safety issues of satellite newsgathering.

Media Effects and Society Elizabeth M. Perse 2016-08-05 Grounded in theoretical principle, *Media Effects and Society* help students make the connection between mass media and the impact it has on society as a whole. The text also explores how the relationship individuals have with media is created, therefore helping them alleviate its harmful effects and enhance the positive ones. The range of media effects addressed herein includes news diffusion, learning from the mass media, socialization of children and adolescents, influences on public opinion and voting, and violent and sexually explicit media content. The text examines relevant research done in these areas and discusses it in a thorough and accessible manner. It also presents a variety of theoretical approaches to understanding media effects, including psychological and content-based theories. In addition, it demonstrates how theories can guide future research into the effects of newer mass communication technologies. The second edition includes a new chapter on effects of entertainment, as well as text boxes with examples for each chapter, discussion of new technology effects integrated throughout the chapters, expanded pedagogy, and updates to the theory and research in the text. These features enhance the already in-depth analysis *Media Effects and Society* provides.
